Commissioner of Patents

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

There are many examples in the specification and claims where the sequences are not properly identified with the appropriate SEQ ID No. For example, as set forth in new claim 6, hPTH1-10, is a peptide sequence which is encompassed by the definitions of the sequence disclosure which is set forth in 37 CFR 1.821-.825. Additional pages include 3-5. It is noted that "new claim 6" was filed as "new claim 7", however, there is no claim 6 and claim 7 was renumber pursuant to R.126. Additionally, examiner notes that the numbers in parenthesis appear to correspond to the sequence numbers in the listing. However, please clarify that these numbers are the sequence identification numbers. These pages should have the appropriate SEQ ID No. following the sequences as per the requirement in 37 CFR 1.821-.825.

Additionally, applicant needs to file a disk encompassing the listing. See attached Notice To comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures
